FY2025 U.S. State Housing Finance Agencies ACFR and Financial Statement Analysis

Prepared: August 09, 2026 | Coverage: 51 states/territories | Reports obtained: 44 FY2025 filings

I. Executive Summary

Fiscal year 2025 (year ended June 30, 2025 for most agencies; a few report on a calendar year) was a consequential period for State Housing Finance Agencies (HFAs). Interest rates eased, competition for Low-Income Housing Tax Credits (LIHTC) intensified, and first-time homebuyer programs continued to expand. This report compiles and compares publicly available ACFRs and audited financial statements for HFAs across all 51 states and the District of Columbia. As of the preparation date, 44 FY2025 reports were obtained (86% coverage).

Among 44 agencies with extracted metrics, aggregate net position is approximately $44.68B and aggregate total assets approximately $179.91B. These aggregates are indicative of sector scale only and are not comparable to consolidated financial statements given differing reporting bases. State HFAs function largely as bond-financed intermediaries: mortgage and development loans on the asset side, and housing bonds on the liability side. The net position ratio (net position divided by total assets) is a useful indicator of financial cushion and resilience.

The strongest year-over-year increase in net position was recorded by MS (MHC), at +121.2%, bringing net position to $38.8M. Such gains often coincide with higher bond issuance, portfolio growth, or fair-value recovery, and should be interpreted alongside housing production measures (for example, units financed).

II. Rankings

2.1 Top 10 by Net Position

Rank	State	Agency	FY2025 Net Position	FY2025 Total Assets	Net Position Ratio
1	FL	FloridaHousing	$4,771.1M	$7,722.4M	+61.8%
2	VA	VirginiaHousing	$3,963.1M	$12,350.1M	+32.1%
3	CA	CalHFA	$3,442.9M	$4,980.0M	+69.1%
4	HI	HHFDC	$2,653.2M	$2,708.7M	+98.0%
5	MA	MassHousing	$2,083.9M	$8,079.7M	+25.8%
6	AK	AHFC	$1,699.2M	$4,734.4M	+35.9%
7	IA	IFA	$1,664.6M	$6,173.2M	+27.0%
8	MN	MNHousing	$1,649.4M	$8,543.3M	+19.3%
9	IL	IHDA	$1,533.7M	$7,846.5M	+19.5%
10	MI	MSHDA	$1,292.0M	$8,027.8M	+16.1%

Florida, Virginia, and California lead by net position, followed by Hawaii and Massachusetts. Larger agencies typically operate both multifamily housing revenue bond and single-family mortgage programs. Size is not a performance scorecard, but it often correlates with stronger market access, lower marginal funding costs, and greater capacity to finance large affordable housing transactions when federal policy shifts.

2.2 Top 10 by Net Position Growth

Rank	State	Agency	Net Position Change	Growth Rate	FY2025 Net Position
1	MS	MHC	$21.3M	+121.2%	$38.8M
2	LA	LHC	$198.7M	+31.9%	$821.7M
3	MD	CDA	$125.0M	+28.0%	$572.1M
4	CT	CHFA	$192.6M	+25.2%	$957.0M
5	IN	IHCDA	$101.6M	+20.4%	$599.5M
6	OH	OHFA	$86.9M	+19.8%	$526.1M
7	MN	MNHousing	$259.9M	+18.7%	$1,649.4M
8	UT	UtahHousing	$96.2M	+18.7%	$610.6M
9	WI	WHEDA	$169.7M	+17.6%	$1,134.1M
10	CO	CHFA	$143.3M	+17.3%	$971.7M

Louisiana recorded the highest year-over-year net position growth, with Connecticut, Indiana, Ohio, Minnesota, and Utah also posting gains in the mid-teens to mid-20s. Rapid growth commonly reflects a rebound in bond issuance, releases of loan-loss reserves or fair-value gains, or stronger fee and spread income from state homebuyer programs. Gains driven mainly by fair-value changes rather than operating results may prove less durable.

2.3 Top 10 by Total Assets

Rank	State	Agency	FY2025 Total Assets	FY2025 Net Position
1	VA	VirginiaHousing	$12,350.1M	$3,963.1M
2	MN	MNHousing	$8,543.3M	$1,649.4M
3	CO	CHFA	$8,385.3M	$971.7M
4	PA	PHFA	$8,211.3M	$890.3M
5	CT	CHFA	$8,122.4M	$957.0M
6	MA	MassHousing	$8,079.7M	$2,083.9M
7	MI	MSHDA	$8,027.8M	$1,292.0M
8	IL	IHDA	$7,846.5M	$1,533.7M
9	FL	FloridaHousing	$7,722.4M	$4,771.1M
10	IA	IFA	$6,173.2M	$1,664.6M

2.4 Top 10 by Net Position Ratio

Rank	State	Agency	Net Position Ratio	FY2025 Net Position	FY2025 Total Assets
1	HI	HHFDC	+98.0%	$2,653.2M	$2,708.7M
2	KS	KHRC	+81.2%	$78.7M	$96.9M
3	CA	CalHFA	+69.1%	$3,442.9M	$4,980.0M
4	FL	FloridaHousing	+61.8%	$4,771.1M	$7,722.4M

5	LA	LHC	+53.2%	$821.7M	$1,545.0M
6	DE	DSHA	+46.8%	$732.5M	$1,564.9M
7	AR	ADFA	+46.5%	$530.8M	$1,142.2M
8	WA	WSHFC	+42.1%	$1,064.1M	$2,525.7M
9	WV	WVHDF	+39.8%	$640.0M	$1,607.0M
10	AL	AHFA	+37.8%	$516.0M	$1,364.9M

Among larger agencies, Hawaii and California show the highest net position ratios; Florida and Louisiana also sit well above typical peer levels. Smaller HFAs can post elevated ratios because of simpler balance sheets, so size and ratio should be read together. A thicker cushion generally provides more flexibility under asset impairments, interest-rate stress, or narrower refinancing windows.

III. Operating Models: Five Archetypes

FY2025 disclosures suggest five broad operating models useful for cross-state comparison:

- **Bond-financed large agencies:** Examples include Virginia, Minnesota, Colorado, Connecticut, Michigan, and Illinois: large asset bases with liabilities expanding in parallel, and heavy reliance on multifamily and single-family bond programs and GSE channels.
- **High-growth mid-to-large agencies:** Examples include Louisiana, Connecticut, Indiana, Ohio, and Utah: double-digit net position growth on mid-to-large balance sheets, illustrating how issuance cycles and program mix can strengthen equity.
- **Integrated state-department models:** Texas TDHCA is representative: governmental and business-type funds operate in parallel, so the disclosure basis and consolidation scope require careful reading.
- **High-cost coastal markets:** California and Washington are illustrative (New York entity-level filings remain limited). Results track home prices, construction costs, and project pipelines closely. In FY2025, CalHFA reported net position of about $3.44 billion and total assets near $5.0 billion, remaining among the largest state housing finance agencies.
- **Resource and low-density states:** Wyoming, North Dakota, South Dakota, and New Mexico often show more volatile issuance cycles; individual projects can move the financial statements materially.

IV. Interpreting the Numbers

Scale does not guarantee safety. The largest asset bases often carry the highest liabilities and derivative exposure. While interest-rate paths remain uncertain, net position ratio and cash-flow capacity deserve as much attention as asset rankings.

Net position growth is not housing production. Under GAAP, net position can change with investment fair value, loss provisions, or bond premium amortization. Housing output should be validated against program reports (units financed, bonds issued).

Disclosure quality has market value. Agencies that earn the GFOA Certificate of Achievement (for example, Illinois IHDA) tend to publish clearer MD&A, which can reduce investor due-diligence costs and, indirectly, support tighter bond spreads.

V. Recommendations for FY2026 and Beyond

1. **Adopt a common HFA financial health framework.** Standardize disclosure of net position ratio, debt service coverage, delinquency rates, LIHTC pipeline, and the single-family versus multifamily mix so that fragmented narratives can be replaced with comparable metrics.
2. **Connect affordability outcomes to the financial statements.** Add MD&A unit-cost metrics—affordable units per $1 million of bond proceeds, and first-time buyers supported per dollar of net position—to link reported finances to housing results.
3. **Expand regional bond pooling and risk sharing.** Smaller HFAs may lower issuance costs through regional bond pools. Larger HFAs may benefit from more standardized hedging for disaster and interest-rate risk.
4. **Publish machine-readable disclosures.** XBRL or structured CSV supplements would help researchers, rating agencies, and federal partners monitor HFAs on a more timely basis.
5. **Track the missing-middle segment (80%–120% AMI).** Treat middle-income projects as a distinct planning category so resources are not concentrated only at the lowest AMI tiers and the market-rate end of the spectrum, which can leave teachers, nurses, and similar workers underserved.

VI. Data Coverage and File Inventory

State	Agency	Status	File Name	Notes
AK	AHFC	Downloaded	AK_AHFC_FY2025_ACFR.pdf	Core metrics manually verified against AHFC FY2025 MD&A (Condensed Statement of Net Position, June 30 2025/2024), correcting a previously mis-extracted net position figure

VII. States Without FY2025 Reports

As of this report, the following 7 states or territories had no publicly locatable FY2025 ACFR or audited financial statement. Common reasons include incomplete audits, FY2024-only postings, or filings hosted on nonstandard sites.

- AZ - Arizona Department of Housing (ADOH)
- NV - Nevada Housing Division (NHD)
- NH - New Hampshire Housing Finance Authority (NHHousing)
- NJ - New Jersey Housing and Mortgage Finance Agency (NJHMFA)
- NY - New York State Homes and Community Renewal (HCR)
- OR - Oregon Housing and Community Services (OHCS)
- RI - Rhode Island Housing (RIHousing)

Appendix: Methodology

Sources are FY2025 ACFRs or audited financial statement PDFs published by state HFAs or state auditors. Extraction prioritizes MD&A financial highlights and Statement of Net Position lines for total assets, total liabilities, and total net position (often reported in thousands of dollars). Disclosure bases differ across governmental activities, business-type activities, and blended presentations; cross-state comparisons should be read with the accompanying notes.
