The Housing Stability Council will provide [public hearing](#) time in accordance with ORS 456.561. Council's review of loan, grant or other funding award proposals under this section shall be held at a public hearing of the council. A public hearing is a formal proceeding held in order to receive testimony from all interested parties, including the general public, on a proposed issue or action. A public hearing is open to the public but is regarding a specific proposal/project.

All times listed on this agenda are approximate and subject to change. Agenda items may also be taken out of order and addressed at different times than listed. The agenda may be amended by the Council at the time of the meeting.

**Please note the [public hearing process](#)*

The Housing Stability Council helps to lead OHCS to meet the housing and services needs of low- and moderate-income Oregonians. The Housing Stability Council works to establish and support OHCS' strategic direction, foster constructive partnerships across the state, set policy and issue funding decisions, and overall lend their unique expertise to the policy and program development of the agency.

The 2019-2023 Statewide Housing Plan outlines six policy priorities that focuses OHCS' investments to ensure all Oregonians have the opportunity to pursue prosperity and live from poverty.

Statewide Housing Plan Policy Priorities

Equity & Racial Justice

Homelessness

Permanent Supportive Housing

Affordable Rental Housing

Homeownership

Rural Communities

For more information about the Housing Stability Council or the Statewide Housing Plan, please visit Oregon Housing and Community Services online at <https://www.oregon.gov/ohcs/OSHC/Pages/index.aspx>

Re: Approval for 501c3 Bond Issuance

BOND RECOMMENDED MOTION: Move to approve 501(c)(3) Bond Financing in an amount up to and not to exceed \$10,000,000 to Trinity Place LLC for the construction of Trinity Place, subject to the borrower meeting OHCS, Raymond James' placement of the Bonds with a qualified institutional investor(s), closing criteria, and documentation satisfactory to legal counsel for the bond sale.

At the upcoming Housing Stability Council meeting, we will be presenting one (1) transaction - 501(c)(3) Bond for Council approval. The project previously was awarded GHAP funds at the HSC November 3, 2023, meeting, under the NOFA framework as approved by HSC on November 05, 2021; and Agriculture Working Tax Credits approved by OHCS Finance Committee on December 18, 2023.

We would note that this transaction is the first issuance of a 501(c)(3) bond by the Department under its Pass-Through (Conduit) Revenue Bond Program, which will allow the bonds to be issued on a tax-exempt basis based on the non-profit status of the project owner, without an award of private activity bond (PAB) volume cap.

In this memo we are providing you with a high-level summary of the recommended project. More detailed information regarding the project and the additional 501c bonds funding recommendation can be found in the individual project summary.

Once the HSC approves the updated funding allocation, and the sponsor completes OHCS's final remaining closing criteria, the project can proceed to financial closing and begin project construction.

Funding Recommendation:

We are recommending funding a reservation for one (1) project. This project will create **40** units of new affordable housing communities in Central Oregon. The recommendation is for up to \$10 million 501(c)(3) Bonds.

Projects with Other OHCS gap funding

		Total:	\$19,551,133

PROJECT DETAILS

Project Description:	Trinity Place is a new construction, 100% affordable housing development located in Sisters. The project will consist of 40 total new units in one 3-story residential building. There will be 50 surface parking spaces. This proposed parking plan meets zoning requirements. Project amenities will include a community room, on-site manager, and on-site parking, playground, outdoor BBQ, dog run, on-site secure laundry, and a remote work/video conferencing room. Unit amenities will include an electric range/over, microwave, dishwasher, refrigerator, warm and cool air via in-unit PTHP's, and centralized filtered fresh air ventilation. The project received a GHAP and AWHTC funding award under the 2023-8 NOFA for Small Projects. With an allocation of 501(c)3 Bonds, the project will complete its financing to begin construction soon.
----------------------	---

	Trinity Place and the 40 units are a stand-alone project and not subject to a master plan development.
Anticipated closing date	7/30/2025
Focus Population(s):	Families and Individuals earning below 80% AMI
ERJ Strategy:	NHA staff around the state work with households from diverse racial and cultural backgrounds such as Latinx, Native American, African American, Caucasian, Asian, and African residents. Although services plan and delivery structure for Trinity Place are based on the organization’s knowledge of the local demographics and potential residents, especially those at similar rural properties, NHA recognizes that residents can come to the project from a variety of backgrounds and may have a wide range of needs. NHA and its staff are prepared to meet the diverse language and cultural needs of residents that may move into Trinity Place.
Resident Services:	Northwest Housing Alternative (NHA) will serve as the primary resident services provider at Trinity Place. The key role of NHA’s Resident Services Coordinator (RSC) will be to provide residents with the community networks needed to remain independent and self-sufficient, able to make positive life choices, remain stable in their housing, and connected to their community. With NHA’s many years of resident services in their housing portfolio they possess the expertise and knowledge to make access to services adaptable to the local community resources, with cultural sensitivity and reflective of the residents’ support needs. Additionally, Trinity Place’s RSC will focus on developing and nurturing partnerships with current and future service providers. These evolving partnerships ensure the service plan meets changing tenants’ demographics, needs, and the shifting availability of community resources. The Resident Services Coordinator will be responsible for maintenance of partnerships between family resource navigators such as FAN and Neighbor Impact, health providers like Mosaic (a regionally based Federally Qualified Health Center-FQHC with a clinic in Sisters), and nutrition support like the Wellhouse Market and the local farmer’s market/ag producers that accept EBT. While partnerships will be overseen at an elevated level by NHA’s Director of Programs, the RSC for Trinity Place will tailor partnership efforts for services most needed by working individuals and families living at Trinity Place. The RSC for Trinity Place will work to connect with residents, meet with property management, and collaborate with community service providers to coordinate a variety of efforts and events. These will include financial education workshops, life skills classes, access to nutrition resources, rent or utility assistance, and health and wellness education.

Trinity Place – Housing Stability Council

Location Preference:	The project site is located near commercial services, and near public transportation, which provides access to the greater Bend area.
MWESB Target:	Northwest Housing Alternatives and general contractor, CS Construction, are committed to meet the Rural Region 4 goal of 20% participation.

Re: HOME ARP and HOME Funding Recommendation

Motion: Approve the funding reservation recommendation for Ellensburg Apartments in Gold Beach, up to \$10,447,975 in federal HOME ARP in alignment with the 2023 HOME ARP NOFA framework and process and \$2,693,854 in federal HOME in alignment with the ORCA framework and process.

Summary

At the upcoming Housing Stability Council (HSC) meeting, we will be presenting a HOME ARP project for approval by the Council. This recommendation is based on the project fulfilling all requirements of the 2023 HOME ARP NOFA for the HOME ARP funding and the ORCA requirements for the HOME funding. As part of the NOFA, selected projects were given technical assistance and 24 months to submit a full application for funding. The focus of the HOME ARP NOFA was small projects in rural areas serving persons at risk of homelessness.

This project represents one of the 3 projects selected. The other projects are Liberty Village, which was approved for funding in early 2024 and Manor Way Apartments, which was approved at the June 2025 Housing Stability Council meeting.

In this memo, we are providing a high-level summary of the recommended project. More detailed information regarding the project is found in the summary following this cover memo.

Application

This project will add 16 units, through rehabilitation of an existing structure, and 4 units, through new construction on the site, to the state affordable housing stock. Rents in the development will be restricted at 30% AMI.

July 11, 2025

HOME ARP Reservation Recommendation

Development	Location	Number of units
Ellensburg Apartments	Gold Beach	20
	Total	20

Next steps

If the project is approved for a funding reservation, it will receive a reservation and conditions letter and move toward financial closing.

Housing Stability Council Project Summary

SUMMARY			
Project Name:	Ellensburg Apartments		
City:	Gold Beach	County:	Curry
State House District:	9	State Senate District:	5
Sponsor Name:	Coos Curry Housing Authority (CCHA)		
Urban/Rural:	Rural	Total Units:	20
		Total Affordable Units:	20
# Rent Assisted Units:	20	Units by Size & Affordability:	16 1 BR at 30% AMI 4 2 BR at 30% AMI
# of Units with OHCS PSH Services Funding:	0		
Cost Per Unit:	\$657,091	Construction Type:	Rehab (16 units) New construction (4 units)
Affordability Term:	20 years	# of Units with Non-OHCS Requirements:	0
Estimated Funding Request			
HOME ARP HOME Total OHCS Request:	\$10,447,975 \$ 2,693,854 \$13,141,829	Total project cost:	\$13,141,829

We recommend to Housing Stability Council the reservation of an up to amount of \$13,141,829 in HOME ARP and HOME resources for this project, with the expectation that the project retains the characteristics submitted in the original application without substantial changes.

PROJECT DETAILS	
Project Description:	Ellensburg Apartments includes the rehabilitation of an existing two-story structure to create 16 units for seniors at risk of homelessness or experiencing homelessness and the new construction of four two-bedroom units on a vacant portion of the site. Three of the new construction units will prioritize serving seniors with more than one person in their household or that have qualified live-in care needs. The fourth new construction unit will be set aside for domestic violence survivors. All units will be supported by Project-Based Vouchers (PBVs) administered by Coos-Curry Housing Authority The development includes a community room, an on-site office for the Service Coordinator, landscaped common areas, and trauma-informed design elements. The goal of the development is to provide stable housing with supportive services to promote wellness and housing retention for the region's most vulnerable citizens.
Anticipated closing date:	March 2026
Focus Population(s):	HOME ARP eligible households including senior households at risk of homelessness and survivors of domestic violence.
ERJ Strategy:	The South Coast Health Equity Coalition will provide culturally specific services and training to staff working with residents in the project. The Confederated Tribes of Coos, Lower Umpqua, and Siuslaw Indians will support tribal households with comprehensive support and services. The SAFE Project and Brookings CORE Response will also deliver culturally responsive services for households coming from poverty and trauma. Each of these organizations have partnered with staff from CCHA on other projects and have long-standing relationships. MOUs have been executed and are in place for the long-term support of households in the Ellensburg Apartment project.
Resident Services:	Brookings CORE Response will provide wellness and case management services for seniors, including navigation to benefits, behavioral health, and prevention services. The SAFE Project will provide crisis support, safety planning, and trauma recovery services for families impacted by violence. The South Coast Health Equity Coalition will provide culturally specific outreach and translation services. A dedicated on-site Resident Service Coordinator will manage access to these partners, ensure coordination, and facilitate direct services. Services are targeted to reduce isolation, promote stability, and improve overall well-being. Providers have direct experience serving the target populations. Services are trauma-informed and flexible to meet varying acuity levels. Resident Services program goals include:

Ellensburg Apartments – Housing Stability Council

	• Ensure housing retention through regular check-ins and lease compliance support • Handle crises via on-call response and direct DV support from SAFE Project • Support wellness with on-site programming (e.g., wellness workshops, community meals) and referrals to healthcare and behavioral health partners
Location Preferences:	Ellensburg Apartments is located 0.2 miles from Collier Buffington Memorial Park with McKay's Market Grocery Store within a half mile. The project site is served by a Coos County Area Transit van as well as rural shuttle access. An Early and Education Center is located within a mile and the rural location of the project has a walk score of 64.

Re: ORCA Framework Update Recommendations

Motion: Housing Stability Council moves to adopt the ORCA framework updates as presented (or with noted revisions)

Summary

The Oregon Centralized Application (ORCA) is one of the primary ways the state advances housing progress. Through the ORCA, housing investments that boost housing supply are evaluated against standards, including cost controls, that ensure projects are designed and built in ways that serve to help make life more affordable, strengthen local economies, and are responsive and considerate toward housing needs.

As envisioned, the ORCA is continuously improving to maximize efficiency and certainty for our development partners. Last month, we previewed areas of change recommendations to the ORCA with development partners and Housing Stability Council. With this input considered, at the July Housing Stability Council we will provide recommendations for consideration for ORCA framework updates. Notably, with recent legislative investment bills finalized for the Governors consideration, OHCS will now seek to finalize recommendations for set-asides, regions, and resource allocations for the new resources in the coming weeks and provide updates to Housing Stability Council at the July 2025 meeting.

ORCA framework update recommendations:

Clarifying Readiness

Issue:	Once a project receives a Letter of Intent from OHCS following Housing Stability Council, the project moves into Financial Eligibility review where there is a maximum time to complete the assessment. In
--------	--

	launching the ORCA, we have worked to update developer understanding that this phase of project evaluation is intended to be an iterative process and not an “application” that should be submitted at the end of that timeline.
Current:	Projects have 6 months after HSC approval to complete Financial Eligibility before proceeding to Commitment (an additional ~6 months to closing).
Update:	Introduce a review at 3-months to evaluate and check in on submissions to-date within Impact Assessment while maintaining the overall 6-month timeline for Financial Eligibility completion. This incorporates cure periods within the existing timeline and establishes earlier concrete deliverables, while recognizing that lenders/investors typically require HSC approval before providing LOIs.

Leverage Test

Issue:	ORCA funds and subsidy have become an increasingly large share of the overall project development budgets, need to ensure best use of resources
Current:	OHCS conducts subsidy layering during financial review and uses a predictive cost model during underwriting that applies deeper financial scrutiny for projects with cost outliers. OHCS has also adopted subsidy limits.
Update:	As part of OHCS’ broader cost control efforts, we will implement a Leverage Test requiring applicants in the financial eligibility review to demonstrate efforts to include non-state funding and private debt when state subsidies exceed 70% of the development budget.

Gap-only Project Size Limits

Issue:	When the ORCA was initially launched, there were not sufficient Low Income Tax Credits (LIHTC) available to include in the funds offered. This meant that the ORCA was open to fund projects using gap-only investments, without tax credit leverage. Without a maximum size limit of gap-only funding requests, we see very large gap-only requests for projects that could be best-situated to leverage the LIHTC which
--------	---

	brings private investment. Tax credit equity supports a large portion of the overall development budget which reduces reliance on state subsidy. In the first quarter of 2025, the state's Qualified Allocation Plan and ORCA was updated to be able to offer those funds through the ORCA. Given that all funds are now available we are seeking to provide clarity and focus to the gap-only investments to identify where the ORCA should drive requests to the use of the LIHTC funds.
Current:	No project-size limits beyond per-unit subsidy limits. The ORCA gap-only waitlist includes 27 projects, with three requesting over \$48 million each.
Update	Implement a \$35 million cap for gap-only projects. Projects over 50 units should pursue 4% LIHTC or provide justification for gap-only funding. In adopting this change in policy, we would allow existing waitlisted projects with larger requests to retain current waitlist placement and resources though would offer the large projects the opportunity to switch resource use to the 4% LIHTC / gap funding with the same placement, and would need to provide a justification for retaining a gap-only financing structure which would need to be approved by OHCS leadership. If resources in the set-aside are insufficient to fund these projects they will retain place but resources will be able to be committed to the next projects in line under this threshold.

Resource Allocation Policy

Issue:	When resources are insufficient to fund the top waitlisted project, funds remain unused despite later-submitted projects that could be fully funded with available resources.
Current:	Resources are held in set-asides, with leadership decisions to pool resources near biennium end to address uncommitted funds.
Update:	Update waitlist and resource set-aside policies to establish: When set-aside resources cannot fund the top waitlisted projects across the groups, pool funds and allocate based on initial submission timing. Once pooled, where there are not sufficient funds to support large resource asks at the top of the waitlist, allow the selection of projects that were submitted later but have smaller resource asks that could be fully financed. Where resources remain unspent within set-aside categories six months before the end of the biennia, the ORCA resources will be

	pooled across set-asides to fund projects consistent with resource requirements.
--	--

Removing Two Project Limit for Preservation

Issue:	There is a two-project per sponsor per step limit, and we have received feedback that this is too constraining, especially for preservation projects that are at risk of loss. The limit plays an important role in ensuring that all organizations have an opportunity to have applications for funding to be considered along with ensuring sufficient capacity and sponsor prioritization for their project pipelines. However, in the case of preservation it as the unintended impact of requiring organizations to choose between supporting their current project preservation needs and expanding development.
Current:	Two-project per sponsor per step limit; meaning, a sponsor can have only two projects in each of the ORCA steps (Impact Assessment, Financial Eligibility, and Commitment).
Update:	Remove limit for preservation projects, including property stabilization investments.

Date: July 11, 2025

Re: Oregon Centralized Application (ORCA) July 2025 Update

ORCA is one of the primary ways the state advances housing progress. This document expands and provides information about the data that we have available on our website, to increase understanding and share insights about our observations as we continue to lean into our commitments to evaluate and adjust.

ORCA pipeline as of 7-1-2025:

	Intake	Impact Assessment	Resource Waitlist	Financial Eligibility	Commitment	Total
# Projects	66	79	35	16	15	214
# Units	4,122	5,953	2,519	1,336	945	15,229
\$ Requested	\$601,238,110	\$1,194,979,501	\$643,570,248	\$224,904,780	\$189,751,810	\$2,854,444,448

Additional information can be found online for **available resources & waitlist** ([link](#)) and all **pipeline data** ([link](#)).

Key updates:

- Recommended ORCA updates are being brought to Housing Stability Council (HSC) this month for consideration.** Last month, we previewed the updates with development partners and HSC. With input, we are bringing these updates back to HSC for adoption. The changes are needed to ensure that the ORCA continues to work with additional legislative investment for the 2025-27 biennium, and to be responsive to partner feedback. Recommendations on the set-asides and regions will be finalized with consideration to new legislative investments in the coming weeks.

- **The new selection process for 9% LIHTC that was adopted into the Qualified Allocation Plan earlier this year has been finalized.** Detailed information on that selection process is provided below. Of the 20 projects that submitted a 9% tax credit application will move forward with their ORCA application to utilize 9% Low Income Housing Tax Credits to support their projects. Those projects selected to use 9% LIHTC are currently proceeding to the Impact Assessment application in the ORCA. In the coming months, as the projects applications are assessed to have met standards within Impact Assessment, they will be brought to Housing Stability Council with formal recommendations to finalize the resource commitment.
- **OHCS available resources are being updated for the 2025-27 biennium.** The legislature passed bills that invest in affordable rental housing, and those bills are currently with the Governor for signature. OHCS will finalize recommendations for set-asides, regions, and resource allocations for the new resources in the coming weeks and provide updates to Housing Stability Council at the July 2025 meeting.
- **ORCA Retrospective.** At the end of this memo is a brief reflection over the first year of ORCA operations, along with a look forward.

9% LIHTC Detail:

Background

OHCS opened the 9% LIHTC ORCA process on March 13, 2025, with an offering of \$11.4 million in 9% federal Low Income Housing Tax Credits (9% LIHTC). Interested parties were required to submit a 9% LIHTC Request Form by April 24, 2025.

OHCS received 20 requests for 9% Tax Credits. The projects submitted have cumulative requests to fund 1,001 units throughout the state with total funding requested approximately \$34.6 in 9% LIHTC.

The Qualified Allocation Plan specifies that, in addition to a requirement that at least 10% of resources are reserved for Non-Profits and 10% for Culturally Specific Organizations, the 9% LIHTC resources have three set-asides:

- 65% for ORCA geographic regions (Eastern, Western, Metro),
- 25% for Preservation, and
- 10% for Native Nations.

Thirteen requests were submitted for consideration under the Regional Set-Aside with two of those qualifying for the CSO/Nonprofit Rural set aside as well. No requests were received for the Native Nations set aside.

Ranking

Following the process prescribed in the QAP and ORCA Manual, OHCS selected projects with the highest rank within their geographic region or set aside, until remaining credits were insufficient to fully fund the next highest-ranking project.

If the highest-ranking project requested more credits than was reserved for that set-aside, it moved to the next applicable pool of funding. OHCS combined uncommitted credits from all set-asides after the first funding pass into a statewide pool that considers the ranking of all remaining projects and awards credits based on those rankings until all credits were allocated.

Results

Nine projects with a total 9% LIHTC request of \$14,527,256 have been moved to the Impact Assessment stage in the ORCA. These projects will be brought to HSC in the coming months for gap subsidy requests.

Projects receiving 9% LIHTC allocations:

Project Name	Sponsor Name	Project Type	City	LIHTC Req.
Golden Rain	MJ Housing Preservation Initiatives	Preservation	Grants Pass	\$1,749,536
Mississippi Ave.	Self Enhancement, Inc.	New Constr.	Portland	\$1,710,000
Green Family Housing	Adapt Integrated Health Care	New Constr.	Green	\$1,618,000
Wickiup Station Apts. Phase 2	Foundation for Affordable Housing, Inc.	New Constr.	La Pine	\$1,500,000
Alyssa Daye Gardens	Mental Health & Addiction Assn of Oregon	New Constr.	Portland	\$1,562,000
Ochoco Manor	Lee Pacific Properties, Inc. (LPPI)	Preservation	Prineville	\$1,335,394
Horizon Court	Horizon Project Inc.	New Constr.	Hermiston	\$1,052,326
Henry Street Apartments	New Narrative	New Constr.	Beaverton	\$2,000,000
Cascade Peaks	Chrisman Development, Inc.	Preservation	Newberg	\$2,000,000
Total:				\$14,527,256

There were insufficient 9% LIHTC resources to support the remaining eleven projects. Those projects include: Dallas Mill Station, Polk CDC, in Dallas; Rosewood, Housing Authority of Douglas County, in Roseburg; Scenic Heights 2,

Housing Authority of Jackson County, in Central Point; The Rose Apartments, Hampstead Development Partners Inc., in Roseburg; Path Home Family Village Housing, Path Home, in Portland; Manzanita Heights Affordable, CDP Oregon LLC, in Manzanita; Wickiup Station Apts. Phase 3, Foundation for Affordable Housing Inc., in La Pine; Cascade Meadows, Northwest Housing Alternatives, in Milwaukie; Hillside Terrace, NeighborWorks Umpqua, in Coquille; Oregon Rural Preservation Portfolio, Oregon Rural Preservation Portfolio LLC, in Grants Pass; and Jefferson Court-Victoria Arms, MJ Housing Preservation Initiatives, in Grants Pass.

ORCA Pipeline summary:

Step: Intake

There are 17 projects in a 'pre-pipeline' status which means they are early concepts and not yet ready to move to Impact Assessment.

There are 24 projects that recently submitted Intake information that will likely move to Impact Assessment soon.

Finally, there are 25 remaining projects in the Intake step that are currently on hold due to the two projects per sponsor limit; this is a decrease of one project from the previous month. These projects will move forward once the sponsor's other projects are moved into the next ORCA step or are withdrawn. OHCS adopted policy restricts sponsors to not having more than 2 projects in any one step of the ORCA. Those three steps are: Impact Assessment (and HSC waitlist); Financial Eligibility; and Commitment.

Step: Impact Assessment

There are 67 projects that are actively working on their Impact Assessment applications, which is down from last month. That means that their Procorem work centers with application materials are open, and sponsors are gathering the appropriate information to submit to OHCS.

There are 12 projects that have submitted their Impact Assessment application and are being actively reviewed by OHCS.

Step: Resource Waitlist

There are a total of 35 projects currently awaiting resources. Of these, 30 projects are seeking gap-only resources, and five projects are seeking 4% tax credits and gap resources.

The legislature recently passed bills that invest in affordable rental housing development and are currently with the Governor for signature. Potential investments include \$465M for LIFT, \$80M for PSH, and \$50M for preservation for the upcoming biennium. Project outreach is underway to ensure that the projects currently on the waitlist continue to be able to show balanced sources and uses, which will allow them to retain waitlist position when new resources are added to the ORCA.

Resources are being recast for the 2025-27 biennium, including updates to regional set-asides. OHCS will finalize recommendations for set-asides, regions, and resource allocations for the new resources in the coming weeks and provide updates to Housing Stability Council at the July 2025 meeting

Step: Financial Eligibility

Once projects are approved by HSC, they are given up to six months to proceed through the Financial Eligibility step. There are 16 projects currently in this step. OHCS is working to update its public dashboard with additional information about development readiness (local government entitlements, permitting, environmental review, etc.) to increase transparency of production delays/barriers outside of OHCS's control.

Step: Commitment

There are currently 15 projects in the Commitment step. This is the final step where projects move to financial close and receive funding reservation letters. After this step, construction begins.

ORCA Retrospective

ORCA first launched in June 2024, as the first year of ORCA operations concludes and we transition into the new biennia we are looking back to reflect on the impact and intent of change.

Context for Change

The transition to the Oregon Centralized Application (ORCA) reflects OHCS's broader mission: to support stable and affordable housing options for all Oregonians, particularly those historically underserved by state systems. Ultimately, the ORCA represents more than a procedural change – it marks a structural evolution in how Oregon funds and facilitates affordable housing production.

ORCA emerged from a recognition that the previous method of issuing multiple, competitive, program-specific Notices of Funding Availability (NOFAs) on separate timelines was not sufficiently aligning the state and development community efforts to increase the supply of affordable rental housing in communities across the state. The need for change was underscored by Oregon's ongoing housing crisis. According to the Oregon Housing Needs Analysis (OHNA), the state faces a shortfall of over 100,000 affordable housing units and a projected need for nearly 450,000 units over the next two decades. This urgency was formalized in Governor Kotek's 2023 Executive Order on Affordable Housing (EO 23-04), which set a bold production goal of 18,000 affordable units annually – doubling the average output of the previous five years.

In response, OHCS reimagined the affordable rental housing development funding system, replacing the competitive NOFA process with a rolling, standards-based application system centered on readiness and strategic alignment. The ORCA was conceived as a single-entry, multi-step process designed to streamline funding access, reduce administrative burden, and more efficiently deploy state and federal housing resources.

Program Engagement and Responsive Design

During the initial rollout of the ORCA, OHCS Affordable Rental Housing Division (ARH) prioritized a broad and inclusive public engagement process to align with the scale of investment and reforms previously introduced. From August to November

2023, OHCS hosted six virtual and two in-person engagement sessions, gathering meaningful input from a wide range of stakeholders across Oregon's housing development landscape.

The initial goals of this work were identified to be:

- Increase ease of access of Affordable Rental Housing Investments
 - Centralized Application Process
 - Navigation Support and Technical Guidance
- Grow the pipeline while lessening the risk of funding gaps
 - Final funding commitments to projects closer to when they are ready to proceed into construction
 - Implement new state investments in predevelopment
- Increase clarity and consistency of requirements and performance to policy objectives
 - Organizational pre-qualification stage
 - Incentivizes performance

To guide our work, ARH identified the following values to guide our approach to this work:

- Production Needs – alignment with Executive Order 23-04
- Predictable and Available Resources – resource clarity and availability to expedite development
- Tenant Centered – building design and funding strategies
- Serve the State – intentionally offset impacts of historic lack of investment
- Equity and Racial Justice – disrupt impact of systems that have prevented access to resources

OHCS engaged deliberately across 14 topic areas central to the funding redesign, including readiness, predevelopment, pre-qualification, pipeline support, organizational commitments to advancing diversity equity and inclusion, loan guarantee programs, preservation, resource set-asides, equity and racial justice strategies, resident services, operating costs, construction costs, and methods of project evaluation. OHCS leveraged stakeholder feedback to both guide the creation of the ORCA structure as well as to ensure tracking and consideration for future policy decisions. In total, the engagement effort drew an average of 114 participants per meeting, with follow-up surveys and Easy Retro boards used to collect additional input from those unable to attend in real time.

OHCS staff synthesized thousands of data points, summarized the feedback into clear themes, and posted discussion summaries and meeting recordings publicly to support ongoing transparency. The themes highlighted in this feedback emphasized the need for clarity on funding commitments, process flexibility to accommodate project variation, and equity safeguards to prevent new barriers for culturally specific and smaller non-profit developers. OHCS provided written responses to each thematic area, illustrating how input would shape future recommendations, communication strategies, and structural adjustments to the ORCA.

Through this structured, multi-platform engagement – spanning breakout room discussions, surveys, public comment letters, and interviews – OHCS strengthened communication between the agency and its development partners. This iterative dialogue not only helped to refine the ORCA process but also demonstrated OHCS’ commitment to building a system responsive to real-world development challenges and partner capacity.

Program Structure and Innovation

Unlike the traditional NOFA process, which relied on multiple, competitive, program-specific funding rounds with varying timelines, ORCA introduces a streamlined, standards-based application structure. The process begins with an always-open Intake stage, accepting submissions on a rolling basis, and proceeds through three defined stages: Impact Assessment, Financial Eligibility, and Commitment. This structure enables a rolling evaluation of projects, allowing those that are ready to move forward without waiting for the next funding opportunity.

One of the ORCA’s most innovative features is its emphasis on early engagement and ongoing feedback. In the ORCA, applicants are reviewed against standard requirements and OHCS is empowered to provide feedback and guidance related to meeting requirements including documentation rather than in a competitive NOFA application process where projects were scored against variable factors without ability to remedy deficiencies through that scoring process. Along with the launch of the ORCA, a dedicated Application team along with a Technical Advisor team were created to support providing consistent and clear guidance along with technical assistance.

By supporting projects earlier and providing multiple points of contact throughout the application process, the ORCA seeks to create clear expectations on project timelines while also allowing OHCS and developers to navigate the inevitable unanticipated development barrier that requires a change in scope or timelines. Additionally, by finalizing the funding after core diligence has been completed, projects are better able to resolve challenges to allow the projects to move forward. This proactive, collaborative approach reduces the number of disqualified or delayed applications and are less likely to stall mid-development due to unexpected obstacles or unmet requirements.

To continue supporting transparency and accessibility, OHCS established a FAQ portal alongside the ORCA rollout. Over the first year, 166 entities submitted a total of 557 questions through this portal. The FAQ portal also serves as a feedback mechanism for applicants, allowing the submission of questions as well as observations about the process. The Applications Team routes each question to the appropriate subject matter expert within the Affordable Rental Housing Division (ARH) of OHCS and ensures that applicants receive accurate, timely responses.

First Year Performance

Since the ORCA launched in June 2024, and through mid-June 2025, ARH has received a total of 369 Intake Forms, representing over 22,000 units in the pipeline at various stages of development. Of those, 91 projects have completed an Impact Assessment application, with a total of 6,527 units being proposed across the pipeline. Additional work was completed in early 2025 with the update and revision of the states Qualified Allocation Plan to allow both 4% LIHTC and 9% LIHTC resources through the ORCA process. This has allowed the commitment of funding to leverage all available Private Activity Bonds for housing investments in 2025, given a first opportunity with the 9% LIHTC application to include an up-front selection process, and allowed OHCS to deploy resources to those projects that were able to reach construction close before the end of the 2023-2025 biennium.

Out of the 91 projects that have completed Impact Assessment, 42 projects were approved for funding by Housing Stability Council (HSC), representing 2,797 units. These numbers represent a significant contribution toward the state's ambitious housing production goals. The summary of these investments include:

- 2,200 new construction units in 29 projects
- 147 units through like-new market acquisition in 2 projects
- 450 units in 10 preservation projects

The entities represented included 19 non-profit developers, 17 for-profit developers, and 5 public housing authorities. No projects were submitted by local governments or Tribes reached Impact Assessment approval during this period. With intention to ensuring access, ARH Technical Advisors work with both local governments and Native Nation project development teams to strengthen relationships support priority rental housing projects.

Projects that meet eligibility but cannot be funded immediately due to limited resources are placed on a waitlist. Applications on the waitlist are prioritized according to the final completion date of their Impact Assessment submission. This ensures that eligible projects remain viable and ready to proceed as soon as funding becomes available. The waitlist also allows OHCS to plan strategically and respond quickly to shifts in available funding, as well as providing policymakers, legislators, and executive leadership critical insights into what is ready where and by who as it relates to rental housing development.

As can be seen in the ORCA pipeline as of 7-1-2025, the adoption of the ORCA has creating a thriving pipeline of projects in communities across the state.

	Intake	Impact Assessment	Resource Waitlist	Financial Eligibility	Commitment	Total
# Projects	66	79	35	16	15	214
# Units	4,122	5,953	2,519	1,336	945	15,229
\$ Requested	\$601,238,110	\$1,194,979,501	\$643,570,248	\$224,904,780	\$189,751,810	\$2,854,444,448

Looking Forward

As we transition ORCA into the 2025 – 2027 biennia, we continue to hold central a commitment to evaluation and evolution. The recommended updates to ORCA that will be presented to Housing Stability Council this month represent continued engagement on areas of challenges for applicants, areas where we have not seen the outcomes desired, and areas where the state must continue to adjust and flex with the ever-shifting market. As we move into offering new legislative investments, OHCS

will be able to leverage the ORCA systems to avoid expansive delays that prevent highly impactful projects from getting developed in communities across the state.

Along with the functional revisions, we hope in the coming year to provide increased transparency about our production pipeline performance and readiness; make more investments in the vibrancy and value of rural Oregon, and to get more housing built through persistence and strategies that can better understand and document the real challenges of development in communities across the state.
