

NEW YORK STATE HOUSING FINANCE AGENCY

LIST OF MEASUREMENTS FOR CALENDAR YEAR 2025

The New York State Housing Finance Agency’s (“HFA”) mission is to create and preserve high quality affordable multifamily rental housing that serves communities across the State of New York.

HFA is required to conduct an annual review of the agency’s performance in meeting its mission and must provide that information for the Public Authorities Reporting Information System (“PARIS”) annual filing. That information is presented here.

1. Number of low- to moderate-income units financed:

HFA created and preserved 9,382 affordable housing units in 2025 compared to 5,554 in 2024; 4,970 in 2023; 5,073 in 2022 and 4,577 units in 2021.

HFA financed a total of 41 projects, including 15 new construction projects that created 2,744 affordable units, 25 preservation projects that preserved 6,542 affordable units and one project that included both the new construction of 54 units and the preservation of 42 units. These projects include the creation or preservation of 1,170 units of supportive housing and 825 units of senior housing across the state and units responsive to each of the State’s housing goals.

2. Regional representation of projects financed—this would include the number of cities, counties and the distribution between upstate and downstate:

In 2025, 9,382 affordable units created or preserved across 18 counties.

- 5,063 (54%) were located in New York City;
- 332 (3.5%) were located in Westchester and Long Island; and
- 3,987 (42.5%) were located in the remainder of New York State.

3. Fiscal health:

The state of HFA’s fiscal health will be shared with the Members at the upcoming March or April Board Meetings due to an unexpected delay in the audited financial statements.

4. The Agencies’ accomplishments in connection with their mandated and aspirational MWBE goals and in promoting the participation of underrepresented stakeholders in procurements:

HFA plays a key role in meeting the Agency’s Minority and Women-owned Business Enterprise (“MWBE”) and Service- Disabled Veteran-owned Business (“SDVOB”) utilization goals in the category of construction. Working with HCR’s Department of Empowerment, Compliance, and Opportunity (“DECO”), HFA sets MWBE and SDVOB utilization goals for every project financed. DECO supplies a list of available certified contractors to project sponsors and monitors compliance throughout the course of construction. Failure to comply may result in a requirement to pay liquidated damages. HFA is reflecting MWBE participation in development teams in its materials submitted to the HFA board. For FY 2024-2025, HFA achieved a 35% MWBE utilization rate.

5. & 6. Effectiveness in HFA’s use of volume cap resources and other resources, with an emphasis on maximizing the use of volume cap for affordable housing units within HFA projects, and productive or creative use of financing mechanisms that provide the most efficient capital market executions:

HFA utilized \$1,248,154,507 of volume cap bonds to finance the creation and preservation of affordable and supportive housing by issuing bonds and administering State and Federal appropriations which complemented low-income housing tax credits and private and public investments. In addition, to maximize the use of volume cap resources, HFA implemented the use of recycled bonds and 501c3 bonds and preserved \$176,465,000 of volume cap.

7. Maximizing Green initiatives in its projects, leveraging federal, state and local funds available to Green projects, providing evidence of environmental sustainability and furthering its ability to green all its financing transactions:

HFA continues its efforts to ensure that the affordable housing it finances is sustainable and aligned with the State’s Climate Leadership and Community Protection Act goals of decarbonization. Multifamily projects supported by HFA financings mandate the compliance with HCR’s Sustainability guidelines that promote high efficiency performance, well-sealed building envelopes, national certification standards such as Enterprise Green Communities Criteria and USGBC’s LEED programs, and are aligned with the New York State Energy Research and Development Authority (“NYSERDA”) programs in new construction and preservation of affordable housing.

The below subsections outline HFA’s programs and efforts addressing the above measurement.

HFA New Construction

HFA bonds for new construction projects were first certified by the Climate Bond Initiative (“CBI”) in December of 2016. CBI is an international not-for-profit organization supporting financing for projects around the world that help reduce the impact of climate change, and their strict standards engender the confidence of investors. In 2019, the Agency became the first United States municipal bond issuer to utilize the Sustainable Bond Guidelines (“SBGs”) developed by the International Capital Markets Association. The Agency also became the first issuer to link its financings to the Sustainable Development Goals. Utilization of the SBGs allows the Agency to highlight the social benefits in addition to environmental elements, for its new construction financing program, incorporating the CBI

certification as a capital market's equivalency of the Agency's Energy and Green Building Requirements and corresponding carbon reduction goals. HFA is a national and international leader in issuing certified green and sustainability bonds for affordable housing. As of 2023, projects under our new construction programs must design their projects to meet the State's all-electric design requirements, as prescribed in the Agencies' Sustainability Guidelines, and participate in annual whole building energy benchmarking of utility usage during the years of their HFA regulatory period.

In 2025, HFA issued \$1.23 billion of Sustainability Bonds to fund 23 projects for the creation of 4,369 units. Over \$3.9 billion in CBI certified bonds have been issued since the inception of the NYS HFA program.

HFA Preservation

All HFA preservation projects must comply with the Existing Building Sustainability Guidelines, released by the State in June 2022, which list three construction categories for preservation: Adaptive Reuse, Substantial Rehabilitation, and Moderate Rehabilitation. The target goal for Adaptive Reuse is aligned with the new construction standards listed above. Substantial Rehabilitation targets a 20% energy reduction while also achieving a national efficiency standard. The target goal for Moderate Rehabilitation of existing buildings being preserved as affordable housing is a reduction of energy use by 20%. Currently, rehabilitation projects are not eligible for CBI certification, with the exception of Adaptive Reuse projects. The Agency has utilized the SBGs for the financing of certain rehabilitation projects, again, highlighting the social benefits of the projects alongside the Agency's minimum Energy and Green Building Requirements for rehabilitation projects. As part of the HFA application process, a combined physical needs assessment and an energy audit are required for Substantial Rehabilitation and Moderate Rehabilitation. This tool is the Integrated Physical Needs Assessment (IPNA) and is used to evaluate the proposed scope for projects along with the historical energy usage data. Even if energy efficiency measures identified by the IPNA cannot be included in the project scope due to cost, the projects must comply with the Sustainability Guidelines baseline requirements for their construction type that are in place for all projects to adhere to.

In 2025, HFA issued \$256.15 million of bonds to fund 5 projects for the creation of 1,176 units that were required to provide 20% reduction in energy use.

Construction

HFA increased its efforts to promote and support creative solutions for housing including modular construction, structural timber construction, emerging green building technologies and emerging electrification technologies. This was achieved by educating HCR staff on these emerging techniques/technologies through training webinars, connecting with industry professionals to understand the challenges with these emerging techniques/technologies and working to create guidelines for their implementation in HFA projects. While some of these technologies have been slow to infiltrate the market due to the learning curve for developers, designers, and contractors, HFA continues to prepare by developing a thorough understanding of these emerging trends and developing the tools to properly assess them in proposed projects.

Emerging green building and electrification technologies have been at the forefront of these efforts, and as part of the Agency's Clean Energy Initiative (CEI) funding, we have implemented dedicated support for development teams. Every CEI awarded project is assigned a Technical Assistance Provider (TAP) who are industry specialists in energy efficiency and electrification, at no additional cost. TAPs guide the development teams through the program and provide additional support as teams navigate high-performance building design and construction. This model helps to ensure that the market continues to knowledge-share and train-up to implement emerging technologies and techniques.

8. Evidence of the advancement of the Agencies' fair housing goals:

See the Fair Housing section below.

9. Expansion of efforts to promote and build diversity within the development community while furthering MWBE goals:

Working with DECO, HFA sets MWBE and SDVOB utilization goals for the construction of every project financed. In addition, HFA collects information on the MWBE status of development partners, and reports that to the HFA board.

10. Support and funding of transit-oriented development:

HFA prioritizes the development of projects that adhere to the principles of transit-oriented development (TOD). This approach integrates land use and transportation planning to create vibrant, sustainable communities centered around accessible and efficient transit options. The Agency's projects exemplify this commitment, as all 2025 projects were transit-oriented developments with access to public transportation. Each project's access to public transportation is included in the "Location" section of the Board memos, which cite information about the transit-oriented nature of the Agency's projects. Furthermore, HFA is a Covered Agency under the New York State Smart Growth and Public Infrastructure Act (the "Act"), which requires that HFA review proposed projects under the criteria specified in the Act when there is the acquisition, construction, or expansion of infrastructure related to the HFA project. The HFA Smart Growth Advisory Committee ensures compliance by reviewing the relevant HFA project based on the Act's criteria which aims to limit urban sprawl and environmental degradation and encourage the use of existing infrastructure, including transportation infrastructure. For projects that do not abide by the criteria in the Act, HFA requires the project to comply with mitigating factors for it to proceed. By emphasizing TOD, HFA aims to enhance connectivity, reduce reliance on private vehicles, and promote a more environmentally friendly urban landscape across New York State.

11. Available metrics to understand the types of construction methods that are used in Agency projects.

HFA's data on all projects with innovative construction are still too preliminary to report on, but the data pool on these projects should grow over the next year or two. The metrics being collected on these projects include proposed costs, final costs, feasibility of Design

Guidelines compliance, construction time, and notable issues during construction. To date, HFA has seen an improvement in the costs savings, time savings and design compliance in newer projects. Many of these improvements can be attributed to contractors or consultants that have experience in innovative construction techniques and the ability for factories to adapt their manufacturing lines to accommodate larger HFA projects. The Agency has also found that fully modular/panelized projects have realized greater time and costs savings than those that are only partially modular/panelized. One example of this is Perry Homes in Buffalo, which utilized panelized construction that included the structure, sheathing, some MEP rough-ins, doors and windows into the panels shipped to site. The scale of the project along with this innovative construction technique allowed for an expedited construction time (30 buildings with 405 units to be complete in approximately 2 years). The cost of the project is notably lower than other similar projects. Other innovative solutions such as mass timber and 3D concrete printing have not yet been proposed in any HFA projects.

See also #7 above to learn more about HFA's continuous efforts to ensure that the affordable housing it finances is sustainable and aligned with the State's Climate Leadership and Community Protection Act goals of decarbonization.

STATE OF NEW YORK MORTGAGE AGENCY

LIST OF MEASUREMENTS FOR CALENDAR YEAR 2025

The State of New York Mortgage Agency’s (“SONYMA”) mission is to provide: (1) capital to promote affordable homeownership opportunities for low- to moderate- income citizens of New York State and (2) mortgage insurance to lower the cost of borrowing for both eligible homebuyers and owners of affordable multifamily buildings.

SONYMA is required to conduct an annual review of the agency’s performance in meeting its mission and must provide that information for the Public Authorities Reporting Information System (“PARIS”) annual filing. That information is presented here.

1. The number of mortgages purchased, and the incomes served:

The Agency purchased 1,384 mortgages in 2025, compared to 1,694 in 2024, and 1,701 in 2023, serving the following income ranges:

Distribution of Purchases			
Income Ranges	<u>2023</u>	<u>2024</u>	<u>2025</u>
>100% of AMI	27.45%	26.98%	27.89%
80% to 100% of AMI	27.60%	22.26%	26.23%
60% to 80% of AMI	26.15%	28.69%	28.18%
50% to 60% of AMI	10.08%	13.70%	9.32%
<=50% of AMI	8.72%	8.38%	8.38%

2. The geographic diversity of mortgages purchased as well as number and geographic diversity of participating originators:

SONYMA has continued to expand its impact with continued industry outreach. The agency also benefits from the 2021 bill that was passed in New York State that makes it easier for SONYMA to on-board Community Development Financial Institutions, including Credit Unions, who may share the same goals as SONYMA and who operate at a local level.

[remainder of page intentionally left blank]

SONYMA participating lenders cover the entire state, and loans were purchased in accordance with the following geographic breakdown:

% of Loans Purchased			
<u>Region</u>	<u>2023</u>	<u>2024</u>	<u>2025</u>
1 - Buffalo	17.99%	18.00%	13.87%
2 - Rochester	10.93%	17.06%	17.12%
3 - Syracuse	3.82%	3.66%	4.41%
4 - Binghamton	2.47%	2.89%	3.61%
5 - Mid-Hudson	3.88%	4.49%	4.41%
6 - Capital	5.11%	5.19%	5.27%
7 - Mohawk Valley	1.06%	2.60%	1.73%
8 - Downstate	11.17%	8.62%	9.18%
9 - Long Island	25.16%	17.89%	20.09%
10 - NY City	18.40%	19.60%	20.30%

3. The number of mortgage loans made to African American, Hispanic and other ethnic populations that have been historically underrepresented as homeowners in the State:

In 2025, the Agency funded 619 loans totaling \$187.6 million in first liens with \$9.19 million in down payment assistance to minority households across all programs. This is a decrease from 702 loans totaling \$184.8 million in first liens with \$8.80 million in down payment assistance in 2024; and 655 loans totaling \$165.7 million in first liens with \$5.72 million in down payment assistance in 2023.

In 2025, 44.73% of loans were made to minority households, an increase from 41.15% in 2024 and 38.51% in 2023.

[remainder of page intentionally left blank]

Race	Hispanic/Latino	Non-Hispanic	Did Not Respond	Grand Total
Black/African American	33	179	27	239
Asian				
Asian-General	1	62	7	70
Asian-Other	2	26	3	31
Chinese	0	23	0	23
Filipino	0	2	0	2
Indian	1	23	1	25
Japanese	0	2	0	2
Korean	1	4	0	5
Native American/Pacific Islander				
Guamanian	1	0	0	1
Hawaiian	0	0	0	0
Native American	5	4	1	10
Other Pacific Islander	1	0	0	1
Two or More Races	1	0	0	1
White	140			140
Did Not Respond	69			69
Grand Total	255	325	39	619

Note: The Home Mortgage Disclosure Act (HMDA) of 1975 asks mortgage applicants to identify both race and ethnicity on mortgage applications. Historically, SONYMA has included applicants who identify as Hispanic (ethnicity) and White (race) households in the total for “Minority”.

In 2025, SONYMA continued the Give Us Credit pilot program aimed at increasing homeownership in targeted communities using reimaged metrics and standards to evaluate credit worthiness. The program, based on SONYMA’s data analysis of rejection rates for mortgage applicants of color, utilized nuanced underwriting criteria to avoid practices which tend to disadvantage communities of color due to historic economic and lending practices. These alternative underwriting protocols extend beyond credit history or credit score in determining who is credit worthy, including things like paying rent on time, non-traditional savings practices and non-traditional sources of income.

SONYMA’s Credit is Due program supports Participating Lenders who have developed a Special Purpose Credit Program (SPCP) to address racial disparities in mortgage lending. SPCP’s were established by Regulation B of the Equal Credit Opportunity Act to allow for targeted credit assistance for special social needs. In 2025, the program was revised to offer an interest rate reduction up to 1.5% off prevailing rates, as needed to qualify; and Give Us Credit alternative underwriting for applicants who need it to qualify. As of December 31, 2025, eight lenders were actively participating in the Credit is Due program.

Additionally, the Agency launched Enhanced Down Payment Assistance (eDPAL), from a limited funding source, offering up to \$30,000 in down payment assistance to minority households under the Credit is Due program. As of December 31, 2025, the Agency funded

\$8.3 million in eDPAL under the program which supported 371 mortgages totaling \$149.2 million in total principal.

4. The performance of the loan portfolio:

As of October 31, 2025, SONYMA's loan portfolio had a delinquency rate of 2.58%. This rate is significantly better than the state average of 3.14% and close to the national average of 2.38%. As of November 30, 2025, there were 23,870 loans in the portfolio.

5. Fiscal health:

The state of SONYMA's fiscal health will be shared with the Directors at the upcoming March or April Board Meetings due to an unexpected delay in the audited financial statements.

6. Introduction of innovative programs and products that accomplish the program goals:

- a. Focus on low-income homebuyers:** During 2025, the Agency continued to direct its energies towards providing mortgage loans to those individuals and families for whom SONYMA mortgages make the difference in achieving sustainable homeownership.

The Agency focused mortgage financing activities on the Achieving the Dream Program, which assists lower-income homebuyers. In 2025, 1,129 of the Agency's mortgages were originated through this program, a decrease from 1,351 in 2024 and 1,274 in 2023. Overall, 998 of the mortgages purchased were made to low-income homebuyers (80% of area median income or less), a decrease from 1,237 in 2024, and 1,017 in 2023; and 619 loans SONYMA purchased statewide were made to minority households, a slight decrease from 697 in 2024, and 655 in 2023.

In September 2023, the Agency launched DPAL Plus offering up \$30,000 in down payment assistance to households under 80% AMI utilizing the Achieve the Dream program. As of December 31, 2025, the Agency funded \$26.4 million in Down Payment Assistance under the program which supported 951 mortgages totaling \$90.8 million in total principal.

Also in August 2022, the Agency launched a limited DPAL Plus program targeted to residents of the East Buffalo region. Under this program, 124 mortgages totaling \$17.6 million in total principal and \$3.5 million in Down Payment Assistance were originated through December 31, 2025.

- b. Focus on increasing homeownership in communities of color:** As stated in section 3, SONYMA has made significant strides in serving applicants of color due in part to the Credit is Due program. Since launching this program, the agency has increased its lending to minority borrowers from 36.70% in 2020 to 44.73% in 2025.

- c. **Continuing efforts to educate and inform major stakeholders on key SONYMA programs:** In 2025, SONYMA continued outreach efforts, with over 200 virtual and in-person events. The agency expanded its direct community engagement with faith-based groups, colleges/universities, veterans' groups, civic organizations, and others across the State of New York through collaborative virtual and in-person events. These events have deepened the Agency's relationships with its partners in the housing community and provided additional opportunities to promote SONYMA products and services.
- d. **Manufactured Home Loan Program:** SONYMA is among the first HFAs in the nation to launch a non-mortgage home loan program for buyers of manufactured homes who plan to site the home in a manufactured home community. This product is critical to low-income homebuyers, particularly in rural communities, who are otherwise limited to high cost, often predatory chattel loans. SONYMA has onboarded three lending partners for this new program, which includes Down Payment Assistance and industry-standard loss mitigation options. Since its launch, the agency has purchased its first loans under the program with over 25 loans in process.
- e. **Community Land Trusts:** SONYMA is one of only a small number of residential lending programs which will finance leasehold mortgages to homebuyers on third-party owned Community Land Trusts ("CLTs"). CLTs are one of the few ways to achieve permanent affordability in the homeownership market which is of critical importance in high-cost areas. The agency has recently authorized 30 leasehold mortgages across the state, in areas such as East Hampton and New York City.
- f. **Continued Outreach Efforts to Industry Partners:** In 2025, SONYMA continued outreach efforts online, with over 120 web-based first-time homebuyer summits and realtor trainings. Additionally, SONYMA expanded the number of webinars offered through SONYMA University, developing content on topics that reflect the feedback and educational needs of attendees and other SONYMA partners. Since launching the effort in 2014, more than 9,000 attendees from our lender, nonprofit and realtor partners have participated in web-based training on SONYMA programs. Additionally, SONYMA offered a continuing education course accredited through the New York State Association of Realtors to approximately 175 realtors state-wide in virtual and in-person events during 2025. SONYMA expanded participation in online events and hosted a series of seminars to promote program rollouts and engage external partners.

Also in the 2021 legislative session, a bill was passed in New York State that makes it easier for SONYMA to on-board Community Development Financial Institutions, including Credit Unions, who may share the same goals as SONYMA and who operate at a local level. Since the passage of the legislation, SONYMA has sustained outreach and trainings to targeted community-based lenders and continued to on-board these lenders as SONYMA Participating Lenders in 2025.

- 7. **SONYMA's accomplishments as they relate to MWBE goals:** The agency has continued to contract with MWBE vendors whenever possible for advertising and promotional

materials. Also, the Agency has initiated a program to provide greater exposure of MWBE certified renovation contractors to borrowers utilizing the RemodelNY program.

**STATE OF NEW YORK MORTGAGE AGENCY
MORTGAGE INSURANCE FUND**

LIST OF MEASUREMENTS FOR CALENDAR YEAR 2025

The New York State Mortgage Insurance Fund (“MIF”) is a component of SONYMA and its mission is to promote the preservation and revitalization of communities across the State of New York by providing insurance on mortgage loans that encourages investment of capital by commercial and public lenders.

The MIF is required to conduct an annual review of the Agency’s performance in meeting its mission and must provide that information for the PARIS annual filing. That information is presented here.

1. & 2. Number of loans, units and dollar amount of new commitments to insure both single family and multifamily and the amount of new policies and commitments for insurance:

The MIF declared primary insurance effective for 17 single family loans with 17 units for a total loan amount of \$4,298,428. The MIF issued new commitments to insure 35 single family loans with 36 units with a total loan amount of \$7,178,456. The MIF provided pool insurance for 1,384 single family loans purchased by SONYMA with a loan amount of \$358,285,339.

The MIF also issued new commitments to insure 46 project loans with 6,581 multifamily affordable units for a total of \$502,234,177 in loan amount. This was a 53% increase from the \$328,729,420 in loan amount in 2024. The increase in the loan amount was due principally to an appreciably higher rate of HFA and Housing Development Corporation (“HDC”) loan originations with MIF Insurance.

[remainder of page intentionally left blank]

3. Fiscal health:

Moody's rating of the MIF's Project Pool Insurance Account remained unchanged at Aa1.
Moody's rating for the Single-Family Insurance Account remained unchanged at Aa1.

Policies in Force and Commitments				
	<u>As of 12/31/2022</u>	<u>As of 12/31/23</u>	<u>As of 12/31/24</u>	<u>As of 12/31/25</u>
<u>Policies in Force (PIF)</u>				
No. of loans	1049	1,053	1,058	1,067
Loan Amount	\$4,677,935,513	\$5,080,596,278	\$5,311,968,568	\$5,609,176,373
Units	112,571	115,679	103,498	106,630
<u>Commitments</u>				
No. of loans	274	246	213	198
Loan Amount	\$2,320,415,967	\$2,075,772,942	\$1,955,126,453	\$1,979,430,927
Units	46,867	29,472	28,111	28,786
<u>New PIF</u>				
No. of loans	92	65	48	53
Loan Amount	\$624,742,441	\$559,571,710	\$373,314,052	\$425,217,380
Units	22,494	6,420	4,887	5,509
<u>New Commitments</u>				
No. of loans	61	59		46
Loan Amount	\$470,898,834	\$612,090,481	\$328,729,420	\$502,234,177
Units	20,673	6,769	4,362	6,581

4. Introduction of innovative programs and products:

The MIF amended its pool policy and committed to provide mortgage insurance for SONYMA's non-mortgage home loan program for buyers of manufactured homes seeking to site their home in a manufactured home community. This program launched in November 2024.

5. The MIF's accomplishments as they relate to MWBE goals:

The MIF insures loans for HFA and HDC which are subject to the MWBE requirements established by those Agencies. The MIF notes whether MWBE developers were participating in insured loans within the materials submitted to the SONYMA board.

AFFORDABLE HOUSING CORPORATION

LIST OF MEASUREMENTS FOR CALENDAR YEAR 2025

The Affordable Housing Corporation (“AHC”) is a subsidiary of HFA. AHC’s mission is to create and preserve affordable home ownership opportunities for low and- moderate income New Yorkers.

AHC is required by law to conduct an annual review of the agency’s performance in meeting its mission and must provide that information for the Public Authorities Reporting Information System (“PARIS”) annual filing.

Note: AHC shares the same Mission Statement and Measurements as HFA (above). Accordingly, some measurements are HFA-specific. AHC has provided relevant information for AHC-specific measurements where possible.

1. Number of low- to moderate-income units and amount financed by year:

AHC assisted in creating or preserving 1,177 affordable housing units in 2025 compared to 1,277 in 2024, and 1,191 in 2023.

<i>Year</i>	<i>Units</i>	<i>Amount Granted</i>
2025	1,177	\$46,233,864
2024	1,277	\$39,937,948
2023	1,191	\$37,107,500

2. Regional representation of projects financed:

In 2025, AHC awarded projects in every geographic region of New York State, covering 36 of the State’s 62 counties.

Approximately 48% of AHC’s 2025 grants were awarded to projects located within New York City. 52% of AHC’s grants were awarded throughout the rest of the state.

[remainder of page intentionally left blank]

Awards Made in 2025		
<i>Region</i>	<i>Units Awarded</i>	<i>Amount Awarded</i>
<i>Western NY (Region 1)</i>	<i>72</i>	<i>\$2,105,000</i>
<i>Finger Lakes (Region 2)</i>	<i>219</i>	<i>\$7,078,864</i>
<i>Central NY (Region 3)</i>	<i>128</i>	<i>\$2,360,000</i>
<i>Southern Tier (Region 4)</i>	<i>31</i>	<i>\$748,000</i>
<i>Mohawk Valley (Region 5)</i>	<i>7</i>	<i>\$172,000</i>
<i>Capital (Region 6)</i>	<i>142</i>	<i>\$2,300,000</i>
<i>North Country (Region 7)</i>	<i>17</i>	<i>\$620,000</i>
<i>Mid-Hudson (Region 8)</i>	<i>116</i>	<i>\$3,565,000</i>
<i>Long Island (Region 9)</i>	<i>70</i>	<i>\$5,250,000</i>
<i>New York City (Region 10)</i>	<i>375</i>	<i>\$22,035,000</i>
<i>Totals</i>	<i>1,177</i>	<i>\$46,233,864</i>

Note: Depending on when the applications were received, the awards were made from current and previous fiscal year allocations and/or repayment funds.

3. Fiscal health:

AHC received a total allocation of \$26,000,000 in State funds for its Affordable Home Ownership Development Program for FY 2025-2026. As in previous years, no more than 50% of that amount will be awarded in one municipality.

4. The Agencies' accomplishments in connection with their mandated and aspirational MWBE goals and in promoting the participation of underrepresented stakeholders in procurements:

Please see MWBE Performance Measures section below. AHC did not issue any procurements in 2025.

5. Effectiveness in HFA's use of volume cap resources and other resources, with an emphasis on maximizing the use of volume cap for affordable housing units within HFA projects:

This measurement does not apply to AHC.

6. Productive or creative use of financing mechanisms that provide the most efficient capital market executions:

This measurement does not apply to AHC.

7. Maximizing Green initiatives in its projects, leveraging federal, state and local funds available to Green projects, providing evidence of environmental sustainability and furthering its ability to green all its financing transactions:

This measurement does not apply to AHC.

8. Evidence of the advancement of the Agencies' fair housing goals:

See the Fair Housing section below.

9. Expansion of efforts to promote and build diversity within the development community while furthering MWBE goals:

While nearly 50% of AHC funds are used to cover MWBE exempt costs (administrative fees, acquisition, down payment and closing cost assistance), AHC worked with DECO to emphasize the importance of compliance with Article 15a and Article 3 to grantees and curated a list of available certified contractors to share with homeowners in the program.

10. Support and funding of transit-oriented development:

This measurement does not apply to AHC.

11. Available metrics to understand the types of construction methods that are used in Agency projects.

This measurement does not apply to AHC.

STATE OF NEW YORK MUNICIPAL BOND BANK AGENCY

LIST OF MEASUREMENTS FOR CALENDAR YEAR 2025

The State of New York Municipal Bond Bank Agency's ("MBBA") mission is to provide access to the capital markets for municipalities to finance their public improvements and to reduce the costs of such financing to participating municipalities.

MBBA is required by law to conduct an annual review of the agency's performance in meeting its mission and must provide that information for the Public Authorities Reporting Information System ("PARIS") annual filing. Given MBBA's inactivity in Calendar Year 2025, an annual review could not be conducted.

TOBACCO SETTLEMENT FINANCING CORPORATION

LIST OF MEASUREMENTS FOR CALENDAR YEAR 2025

The Tobacco Settlement Financing Corporation (“TSFC”) is a subsidiary of the State of New York Municipal Bond Bank Agency’s (“MBBA”). Like MBBA, TSFC’s mission is to provide access to the capital markets for municipalities to finance their public improvements and to reduce the costs of such financing to participating municipalities.

TSFC is required by law to conduct an annual review of the agency’s performance in meeting its mission and must provide that information for the Public Authorities Reporting Information System (“PARIS”) annual filing. Given TSFC’s inactivity in Calendar Year 2025, an annual review could not be conducted.

Evidence of Advancement of Fair Housing Goals

In 2024, HCR published its Assessment of Fair Housing called “Fair Housing Matters NY”, following a public comment period that outlined eight fair housing goals. Below are actions taken in 2025 that, together with actions reported in last year’s report to the board, help further the agency’s fair housing goals.

Goal 1: Build upon opportunities for wealth creation through affordable home ownership.

Affordable homeownership is a cornerstone to New York’s approach to helping families create and maintain generational wealth. In advancement of the objective in Goal 1, the [FY 2026 Enacted Budget](#) features various initiatives led or administered by HCR including:

- \$50 million in new funding for the Rapid Response Home Repair Program (RRHR) and the Resilient Retrofits Program, both of which are administered by HCR and have provided vital assistance, helping over 1,300 homeowners to date recover and prepare for future disasters.
- \$50 million to [launch of “MOVE-IN NY,”](#) an innovative affordable homeownership program that was successfully piloted with the creation of three new starter homes in the Cities of Schenectady, Syracuse, and the Town of Newcomb. The pilot program was a collaboration between HCR and Champion Homes, a manufactured housing company based in the town of Sangerfield in Oneida County.

The three-bedroom, two-bathroom, 1,500-square-foot homes, which include a porch and a garage, were manufactured in a factory and then installed on vacant land owned by local land banks. The homes took six months to complete and cost approximately \$250,000 to build and install — which is up to three times faster and nearly half the cost of comparably sized homes built using traditional construction methods. The homes will be sold for less than the cost of construction to low- and moderate-income homebuyers. The program is now expanding statewide to build up to 200 additional starter homes.

Additionally, legislation was enacted that removes barriers to housing choice including the following:

- Legislation to disincentivize large investment entities who own 10 or more single- and two-family homes and act as a fiduciary for at least \$30 million in assets under management from buying single- and two-family homes en masse. The legislation requires a 90-day waiting period for institutional investors to make an offer on one- or two-family homes.
- Legislation to combat home appraisal discrimination. Appraisal bias throughout the housing industry unjustly strips families of color of this opportunity to build wealth, widening racial homeownership and wealth gaps. This legislation will make it a violation of the State's Human Rights Law to discriminate when providing real estate appraisals or in making such services available.

- Legislation to prohibit institutional investors from claiming depreciation tax deductions for single- and two-family homes, or claiming interest deductions with respect to such homes, to disincentivize their accumulation of single- and two-family homes.
- Creating an affordable homebuyer opt-in property tax incentive for homes built with assistance from governmental entities, nonprofits, land banks, or community land trusts, and sold to low- and moderate-income homebuyers. This will aid such homebuyers by making their dream of homeownership more attainable by bringing down costs and increasing the supply of these homes.
- Establishing an opt-in tax incentive to incentivize redevelopment of vacant or abandoned one-to-four family homes for use as affordable homeownership or rental housing. This tool will help localities across the state revitalize neighborhoods and combat vacant and abandoned properties that are in a significant state of disrepair in neighborhoods that lack the local economic conditions necessary to incentivize redevelopment, while also promoting more affordable housing opportunities.

Goal 2: Increase access to suitable affordable housing for those with disabilities.

Updates towards this goal for 2025 include the following efforts:

- In March, HCR announced that the [New York Housing Search website](#) has been improved and modernized to make it easier and more convenient for New Yorkers to search for available affordable housing, including units adapted for those with mobility and hearing/visual impairments.
- In July, HCR revised its Design Guidelines, which outline the minimum standards of accessibility, quality, function, and durability for all the housing projects HCR funds. In conjunction with the change to the Design Guidelines, HCR revised its Qualified Allocation Plan (“QAP”), which governs the allocation of state and federal Low-Income Housing Tax Credits (“LIHTC”) to incentivize affordable housing projects to exceed the minimum baseline Design Guidelines requirements for accessible units. The new incentive structure, along with the baseline requirements, are expected to increase the total number of affordable accessible units throughout the state.
- The announcement of [\\$45.9 million in conditional awards](#) through the [Empire State Supportive Housing Initiative](#), a program that HCR finances along with other state agencies. The initiative funds supportive services to help stably house New Yorkers experiencing homelessness. The program’s ninth round of funding [resulted in 200 awards](#), which will fund services and operating expenses for up to 8,389 additional units of supportive housing to serve older adults, survivors of domestic and gender-based violence, veterans and chronically homeless families, and individuals with a mental illness or substance use disorder.

This year’s awards include 54 projects in New York City, 21 projects on Long Island, and 125 projects in locations north of the metropolitan area. These conditional awards – the most issued in a single round of the program – came after Governor Hochul secured a 53 percent increase in annual funding for the program as part of the FY 2026 Enacted Budget.

Goal 3: Create more affordable housing with avenues for community supports.

HCR continues its commitment to ensuring that communities across the state have access to the planning and capital resources they need. Recent efforts aligned with Goal 3 include the following:

- In January, \$27 million was awarded to 31 projects through [Round XIV of the Regional Economic Development Council Initiative](#). The grants were awarded by HCR through the federal Community Development Block Grant Program (“CDBG”). CDBG provides funds to cities, towns, villages, and counties to assist low-and-moderate-income communities, households, and people by investing in a range of community planning projects, public infrastructure improvements, and enhancements to public facilities. Awards include 10 community planning projects, seven public facilities, and 14 public infrastructure projects.
- As part of efforts to provide more housing opportunities in well-resourced areas, HCR launched the “Neighborhood Resource Index” (“NRI”), replacing the “Well-Resourced Area” (“WRA”) tracts that were previously used for development incentives. Instead of the two metrics used in WRAs (poverty rate and school performance), the NRI combines 24 metrics across four socio-economic domains – education, income and employment, household demographics, and housing characteristics.
- In September, Governor Hochul announced [\\$200 million in available funding](#) through the State’s two signature downtown revitalization and economic development programs. The funding included \$100 million each for Round 9 of the Downtown Revitalization Initiative (“DRI”) and Round 4 of the NY Forward program, which focuses on revitalizing smaller and rural downtowns. Together, the two programs have awarded \$1.2 billion in funding to 151 communities across every region of the state. Led by the Department of State (“DOS”), DRI communities benefit from partnerships with and coordinated technical assistance provided by HCR, New York State Empire State Development (“ESD”) and NYSERDA. NY Forward builds on the success of the DRI by adopting the same “Plan-then-Act” strategy.

Goal 4: Remove barriers to housing by addressing redlining and disinvestment in neighborhoods.

In advancement of the objectives in Goal 4, the [FY 2026 Enacted Budget](#) features various initiatives led or administered by HCR including:

- \$40 million for Land Banks to redevelop vacant or abandoned properties.
- \$20 million to preserve distressed affordable housing in New York City.

Additionally, HCR [announced in November that \\$16.2 million was awarded](#) to 11 non-profits and local governments across the Finger Lakes, Mid-Hudson, Mohawk Valley, North Country, and Western New York regions to transform vacant and uninhabitable apartments into 230 safe and affordable homes.

Goal 5: Increase access to affordable housing by addressing barriers to housing choice.

Efforts made in 2025 to advance the objectives in Goal 5, include:

- \$50 million in the [FY 2026 Enacted Budget](#) for the first year of the Housing Access Voucher Program, a four-year pilot program for state-funded vouchers for homeless families or families at imminent risk of losing their housing. Vouchers would be available to households making 50 percent of area median income.
- Expansion of the Making Moves Section 8 Mobility Program which provides Section 8 voucher holders a variety of counseling, incentives, and assistance to families in overcoming barriers they may face in accessing well-resourced neighborhood's that meet their families' needs. Studies have shown that although Housing Choice Vouchers nationally and in New York are concentrated in areas of poverty, interventions and assistance such as those provided in the mobility programs result in families moving out of areas of concentrated poverty at rates much higher than those without such assistance. To build on the program's expansion in 2024 to Ithaca and Newburgh, the Making Moves program continued to expand in 2025 to Rochester and Syracuse.
- Review of Occupancy Policies. HCR continued careful scrutinization of requests for local community occupancy preferences and age-restrictions in State-funded projects to ensure that all New Yorkers are made aware of and can access affordable housing opportunities on equal footing.

Additionally, legislation was enacted that removes barriers to housing choice including the following:

- Prohibiting collusion using algorithm-enabled rent price fixing. Recent data shows that price fixing algorithms cost tenants nationwide an estimated \$3.8 billion more in inflated rents last year alone. The software companies make no secret that private data algorithms are intended to drive rent increases, with some openly advertising that they can help property owners outperform the market, resulting in housing market distortion and hurting tenants during a historic housing supply and affordability crisis. This legislation will protect renters from these practices, making New York among the first states in the nation to address rent price fixing collusion using these software services.

Additionally, the updates to the [New York Housing Search website](#) mentioned above in Goal 2 make it easier and more convenient for New Yorkers to search for available affordable housing. The new website provides more robust functionality, including the capability to apply to open affordable housing lotteries and waitlists online.

Goal 6: Increase access to affordable housing through fair housing education and enforcement.

Legislation was enacted that removes barriers to housing choice including the following:

- Strengthening laws and policies to combat home appraisal discrimination. The law will further enable the DOS to fine appraisers for violations, in addition to other existing remedies, with half of those fines going to a fund to support fair housing testing.

Other efforts in 2025 to advance the objectives of Goal 6 include:

- Establishment of the Source of Income Early Intervention and Enforcement Unit. In 2025, HCR partnered with the New York Division of Human Rights (“DHR”) to establish this joint Unit to expedite intervention when Section 8 voucher recipients experience unlawful source of income discrimination. DHR has hired a director for the unit and intakes are underway.

Additionally, the Tenant Harassment Prevention Task Force (“THPT”), which is comprised of HCR’s Tenant Protection Unit, the Office of the Attorney General, and other partnering agencies, has achieved significant victories in seeking accountability from landlords and strengthening protections for renters. Efforts made by the THPT have resulted in settlements with landlords that mandate the reregulation of apartments that were illegally deregulated, payment of civil penalties, ensure refunds for tenants who were overcharged rent and subjected to unlawful charges, and in some cases, establish ongoing independent monitoring to guarantee future compliance.

Goal 7: Promote development of affordable housing in areas where land use and development regulations provide barriers.

In advancement of the objectives in Goal 7, the [FY 2026 Enacted Budget](#) features various initiatives led or administered by HCR including:

- \$100 million Pro-Housing Supply fund for certified Pro-Housing Communities to assist with critical infrastructure projects necessary to create new housing, such as sewer and water infrastructure upgrades. To date, HCR has certified more than 400 municipalities across the State under the program, which allows cities, towns and villages to access up to \$750 million in discretionary funding to help unlock more housing.
- \$5.25M in new grant funding to offer technical assistance to communities interested in becoming pro-housing, that may not have the ability to design and adopt pro-housing policies such as master plans, zoning text updates, and streamlined permitting procedures.

Legislation was enacted that removes barriers to housing choice including the following:

- Allowing certain large 100+ unit rental buildings in New York City that currently include affordable units to partially convert to condominiums in order to preserve expiring affordable units as permanently affordable or increase the amount of existing permanently affordable units in a building. This legislation will help preserve affordable housing supply that would otherwise be lost when tax breaks expire, or increase the supply of existing permanently affordable units, while also increasing homeownership opportunities.

Additionally, the [Housing Acceleration Fund](#) was launched, a \$215 million first-of-its kind program. The Fund, administered by HCR, is intended to speed up construction of shovel-ready mixed-income residential projects across New York State by providing low-cost, construction loans to fill financing gaps in the construction of mixed-income housing developments. The fund is catalyzed by the Governor’s \$100 million investment secured in the FY 2026 Enacted Budget (\$50M in New York City and \$50M outside of New York City) and matched with \$115 million

from awarded participating lenders. The Housing Acceleration Fund awards are expected to result in approximately 1,800 new homes statewide.

Goal 8: Implement environmental justice principles in State-funded housing in response to climate change.

Efforts made in 2025 to further the objectives of Goal 8 include the following:

- HCR’s Sustainability Guidelines, which have been published since 2022, require all New Construction projects funded through any of our multifamily Finance & Development programs (4%, 9%, stand alone, and CIF residential) to be designed to high performance all-electric standards. Projects can receive further incentives/competitive points for committing to stretch goals.
- Incorporating upfront sustainability review and interfacing in the application process for HCR funding.
- Increasing the per project maximum for the Clean Energy Initiative administered by HCR in partnership with NYSERDA that provides funding for highly efficient all-electric retrofits for existing and historic buildings financed by HCR.

2025 MWBE Performance Measurements and Accomplishments

Department of Empowerment, Compliance and Opportunity (DECO)

DECO has worked diligently to further the mission of ensuring that Minority and Woman-Owned Business Enterprise (MWBE) and Service-Disabled Veteran-Owned Business (SDVOB) firms are engaged to the greatest extent feasible. DECO achieves this through the following actions:

1. Analyzing the agencies' expenditures to identify areas for MWBE and SDVOB opportunities;
2. Working with all relevant internal departments to create procurement strategies that prioritize the identification and inclusion of prequalified MWBE and SDVOB service providers; and
3. Participating as a member on all RFP/RFQ selection committees to advocate for MWBE and SDVOB participation in prime contract and subcontracting opportunities.

DECO is also responsible for monitoring compliance and quarterly reporting to the Empire State Development Corporation and the Office of General Services, in addition to the Executive Chamber.

After strengthening the department's construction and procurement compliance teams, DECO devoted more time in 2025 to reinvigorate its engagement efforts. DECO established an Engagement Committee comprised of six staff members inclusive of DECO and the Community Relations Unit from Buffalo, Albany, and the Lexington offices to:

1. Evaluate the effectiveness and benefits of events;
2. Identify and engage with affordable housing trade associations; and
3. Seek new audiences, forums, and panels to share HCR's opportunities for MWBE and SDVOB owners, builders, and professional service providers.

In 2025, DECO improved capacity to evaluate the barriers that prevent MWBEs and SDVOBs from participating in opportunities at HCR. We were more proactive, delving deeper into utilization plans to identify trends or gaps in construction trades on projects and sought better data to understand what kind of projects MWBE firms are developing so we can better align our financing tools and resources. The Agency convened a MWBE Working Group led by the senior leadership of Multifamily Finance & Development and DECO to increase collaboration between these units and to evaluate our internal policies and scoring mechanisms.

For 2026, DECO is procuring an IT solution that is GIS-compatible to identify right-sized opportunities for MWBEs on all new projects by region, municipality, and political districts. This will allow DECO staff to follow through with good faith efforts toward increased utilization.

To effectively monitor MWBE utilization, expenditures are divided into three categories: procurement, development, and bond-related costs.

In 2025, the Agencies' MWBE utilization was:

Overall	32%
Procurement	71%
Construction	32%
Bond Related Activities	16%

In the same period, the Agencies' SDVOB utilization was 7%.

*Data reflects January 1 – September 30, 2025, for HFA/AHC/SONYMA/TSFC/MBBA only. Quarterly expenditure reports for October 1 – December 31, 2025, are currently under review for submission January 15th.
